## Trends in Annual Rates of Death from the 7 Leading Causes of Death Among Non-Hispanic American Indian Men 25-44 Years Old, USA, 1993-1997

Among non-Hispanic American Indian and Alaska Native men 25-44 years old, HIV infection was the third leading cause of death in 1995, after unintentional injury and suicide. Then it fell to seventh place in 1997. HIV infection caused 9% of deaths in this group in 1995, and 4% in 1997.
